## NO<sub>2</sub> Monitor at Town Hall

The Town Hall monitor records the average NO<sub>2</sub> concentration for each hour throughout the day as an indication of the level of air pollution. The monthly average for January was 23.3 µg/m<sup>3</sup>. This is lowest January figure since 2013 reflecting the effect of the Covid lockdown.

The monthly average chart compares the levels detected this year with the average and range of monthly figures for the years 2013 to 2020. The hourly figures for 2021 are provisional.
